The EPIC data system is equipped to collect Physical Needs Assessment ("PNA") data, should this data be required in the future. This data being in the system coupled with the electronic planning process would streamline grantee planning. The EPIC data system is equipped to collect information about the Energy Performance Contract ("EPC") process,

including the energy efficiency improvements. As the Department moves to shrink its energy footprint in spite of rising energy costs, clear and comprehensive data on this process will be crucial to its success. The EPIC data system is equipped to track development of public housing with Federal funds and through other means, including mixed-finance development.

The follow are the specific revisions to the public burden by instrument:

1. The projected labor burden was decreased for Core Activity due to grantees becoming familiar with navigating that aspect of the EPIC system and because submissions after the first reporting cycle for a grant will be an update to the initial submitted report and will require less labor to complete. This reduced hours from the collection 3,250 hours.

2. P&E Reports are no longer required annually, reducing the number of responses and hours by 7,025.

3. RHF data will no longer be collected as that program is being phased out of CFP, reducing the number of collection hours by 25.

4. The Annual Statement/Budget total number of responses dropped by 100 due to the total number of respondents being lowered.

5. EPIC now collects copies of documents previously submitted on paper covered by CFP, Annual Plan and ACC PRA adding collection hours of 2,800.

6. EPIC has added a way for PHA to request to use additional capital resources via EPIC, increasing collection hours of 7.5.
